

## How to refill your pen and pencil set

[www.reMARKablepens.com](http://www.reMARKablepens.com)

To refill your pen, simply twist and firmly pull it apart at the center band. This will expose a black plastic top inside that twists counter clock-wise allowing you to pull out the spent ink cartridge. Drop the new Cross™ compatible refill into the pen and secure it by turning it clockwise as far as it will go and push the pen back together. Your mechanical pencil uses commonly available .7mm lead like that made by Pentel, BIC, Pilot and others. To refill, simply pull the cap and eraser off and drop more lead in the tube.
