

Care and Refilling Your Perfume Pen

www.reMARKablepens.com

Each uniquely styled pen has a wick all through the barrel, with an applicator tip exposed at the top. Just soak the applicator tip in your favorite scent for three to five minutes. Perfume is wicked into the barrel, and then can easily be applied to your skin. An "O" ring seals off the lid so you can carry your perfume in your purse, or in your cosmetics/ travel bag, without worry. It is a great way to refresh your scent without carrying the whole bottle.

NOTE: Applicator tip may be cleaned by dipping in rubbing alcohol.
